Education

- 2017 - 2021 ● Bs Software Engineering
Comsats University Islamabad
- 2013 - 2016 ● Diploma of Associate Engineering
Construction Technology Training Institute
- 2011 - 2013 ● Matriculation - SSC
Islamabad Model School

Projects

- 2020 - 2021
Final Year Project
Smart Electric Meter System
The SEMS is an **IoT**-based Project with a mobile application developed using **React Native**. The SEMS monitors the electricity line data and stores it in the **Firebase** cloud database. The application displays the usage status, and much more. **Expo** and **Android studio** for development and testing. For the hardware, **Node-MCU** was used.
- 2017 - 2020
Semester Projects
Data Visualization, Computer Graphics, Ai, Web Dev, Data structures and Algorithms, and Database design
I used **Google charts**, **Html** and **CSS**, and **D3.js** to display Olympic gold medal winners’ stats for country and year of winning for the project of Data Visualization

I used **Three.js** Html and CSS to render a scene of a villa for the project of Computer Graphics

I used **python** to create a Wumpus world scenario, an example of a knowledge-based agent that represents reasoning and planning for the Ai project.

I used **Html CSS** and **PHP** to create a video streaming website for the web dev project.

I created a Compression algorithm using **C++** for the data structures and algorithms project

I created a school management system using **MySQL** for Database Project

Experience

- 2020 - 2021
React Native UI / UX
Freelance - Fiverr
I received great reviews for the **react-native Applications** I Developed for my clients, I also receive great feedback for the **UI** and **UX** I designed
- 2019 - 2021
Software Documentation
Freelance - Fiverr
I received great feedback for the software documents that I prepared, documents including **Design documents, Requirement Documents, and Test Documents.**
- 2019 - 2021
Graphics Designing
Freelance - Fiverr
I started as a graphic designer on Fiverr and landed a handful of clients. I did **photoshop, photo restoration, photo manipulation, logo design, banners, and Visual branding**

Tools and Technology

- Technical – Visual Studio, Arduino IDE, Android Studio, Expo, Google Collab, Eclipse, Code Pen, NetBeans, Unity, GitHub.
- Office – Microsoft Office, Google Docs, Grammarly
- Data Visualization – Google Charts, Charts.js, D3.js.
- Graphics Designing and Editing – Adobe Illustrator, Photoshop, Design IO, Pics Art.
- Development Boards – Arduino, Node-MCU, ESP32.
